

Second One Time Mandatory Data Collection

File name: One Time FCC Report_Full_Final Draft.xlsx

Description and Justification

OVERALL

- There are many items in this report that are not tracked or reported at the level of granularity required to report it the way it has been requested. A value of 'N/A' indicates where this is the case.
- Connect Fee, where applicable, has been included as part of Call Revenue in all years

Total ICS-Level Data

- The data in this report comes from a mix of company financial statements and usage data. Revenue and cost is recognized differently in these two systems and therefore the data will differ across the four year period.

Facility-Level Data

- Fixed Site Commissions are not centrally stored and can't be easily reported on. For this reason a value of 'N/A' was entered for all years.
